SHOPIFY DAWN · MOBILE-FIRST REDESIGN

ARVI
Swiss Reserve

A mobile-first storefront for fine and rare wines: calm, editorial and built entirely on Shopify's Dawn theme.

MELANO LUGANO ZURICH

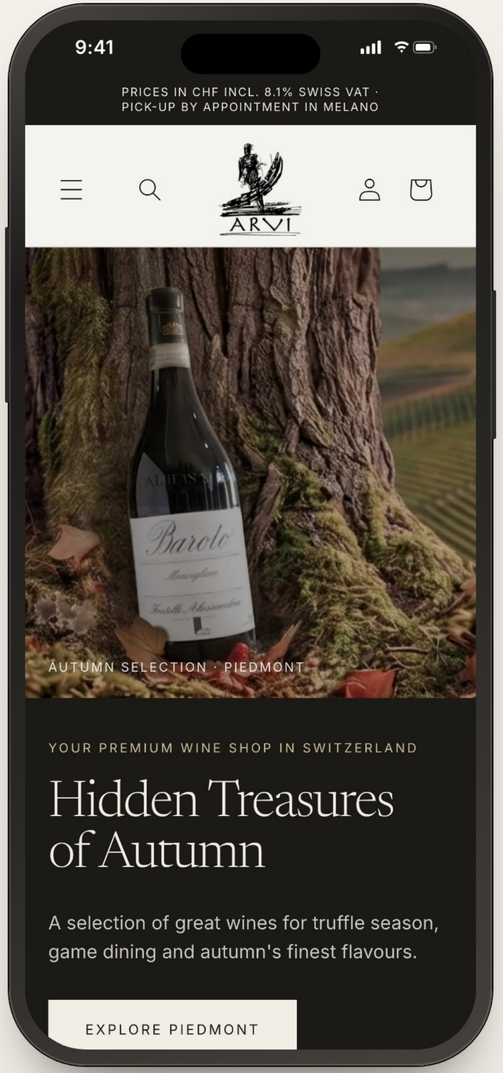

MOBILE HOMEPAGE · HERO

A first screen that sets the tone

On a phone the campaign photograph leads, followed by ARVI's promise and a single primary action. Prices in CHF and pick-up in Melano are stated before anything else.

- **Real content.** ARVI's own autumn campaign and copy; nothing invented.
- **Keeps the bottle in frame.** The mobile crop is a theme-editor setting, not a fixed image.
- **Logo, search, account and cart** stay within thumb reach.

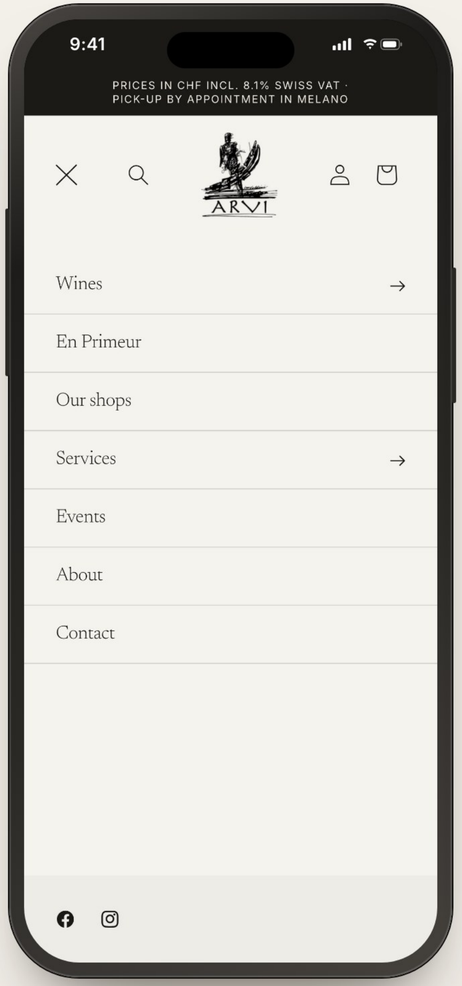

HOMEPAGE, FIRST SCREEN
Campaign image, serif headline, one clear action

MOBILE NAVIGATION

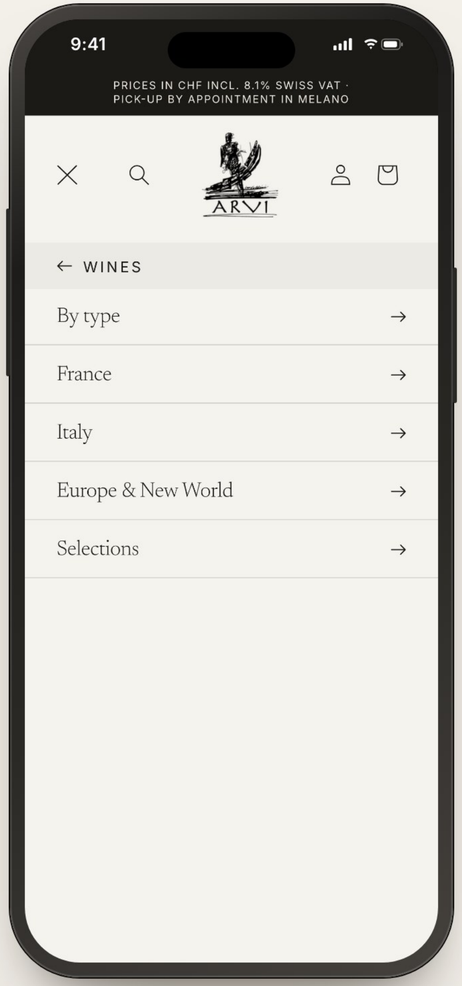

Navigation that reads like a wine list

The menu uses the same serif as the editorial pages, with full-width rows that are easy to tap. Wines opens into the cellar's structure: type, country, region.

MAIN MENU

Serif entries, generous rows

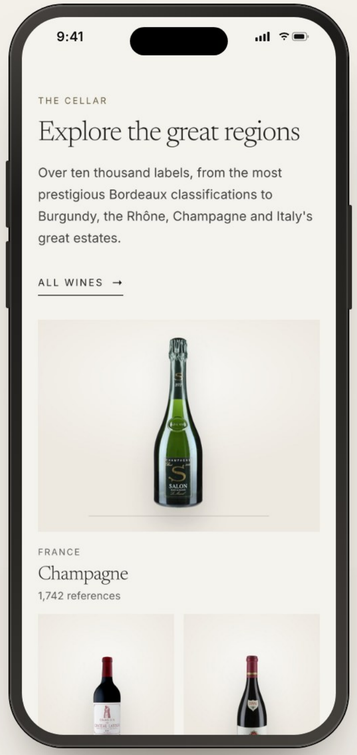

WINES

By type, France, Italy, Europe & New World

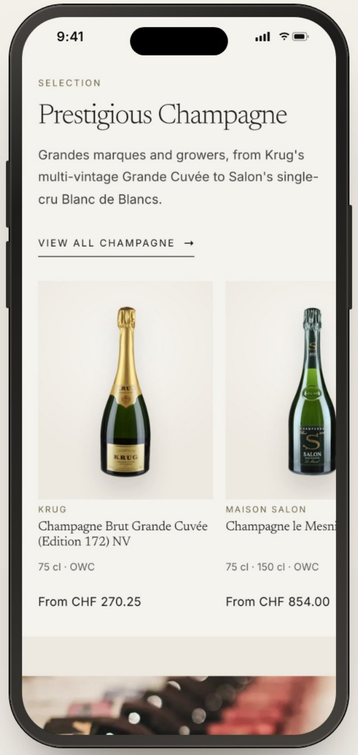

MOBILE HOMEPAGE · SCROLLING I

From regions to the cellar

The homepage reads as one story: where the wines come from, a curated selection, the cellar behind them, and the estates that define fine wine.

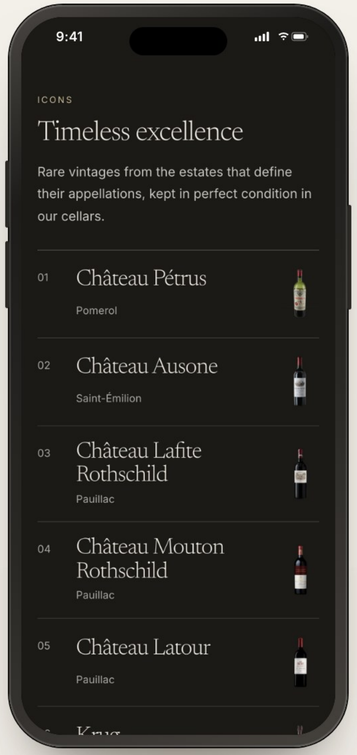

REGIONS
1,742 to 16,792 references each

SELECTION
Swipe through Champagne

PROOF
30+ years · 10,000+ labels

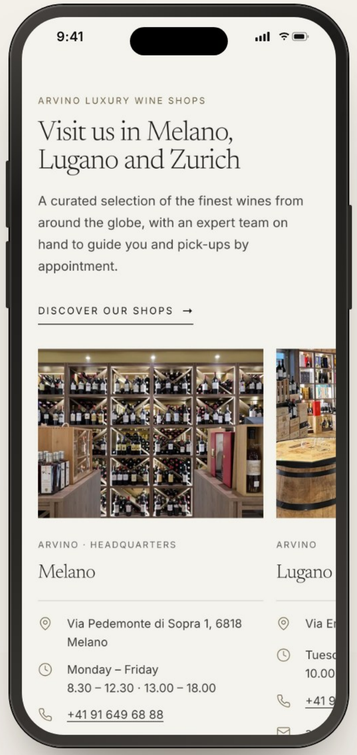

ICONS
Pétrus, Ausone, Lafite…

MOBILE HOMEPAGE · SCROLLING II

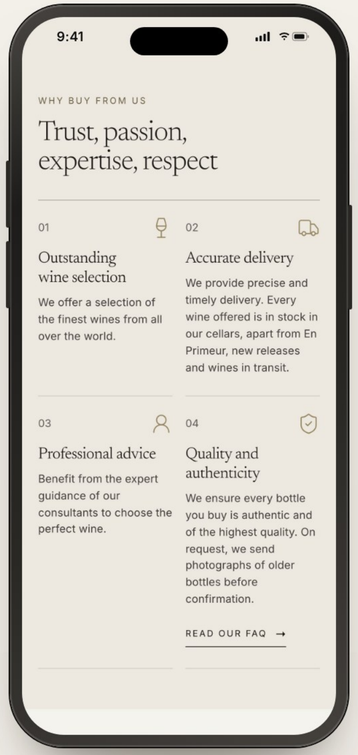

Three boutiques, one house

Long lists become horizontal rails on the phone, so the boutiques, services and selections never turn into an endless stack. The mobile homepage is 26% shorter than in the first build.

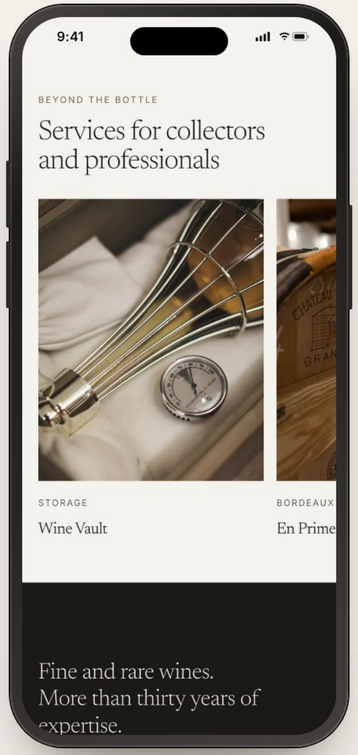

BOUTIQUES

Melano, Lugano, Zurich

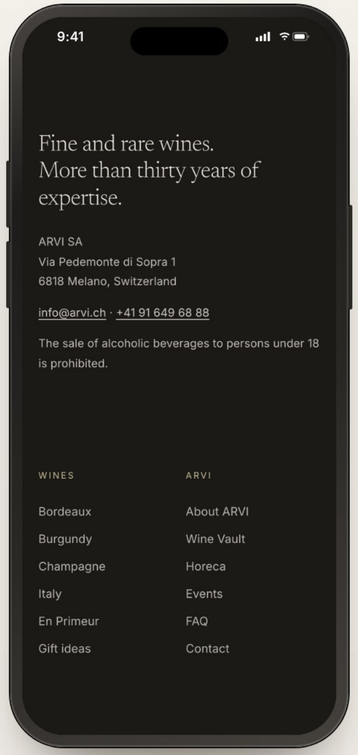

WHY ARVI

Compact two-by-two

SERVICES

Vault, En Primeur, Horeca, Events

FOOTER

Brand, menus side by side

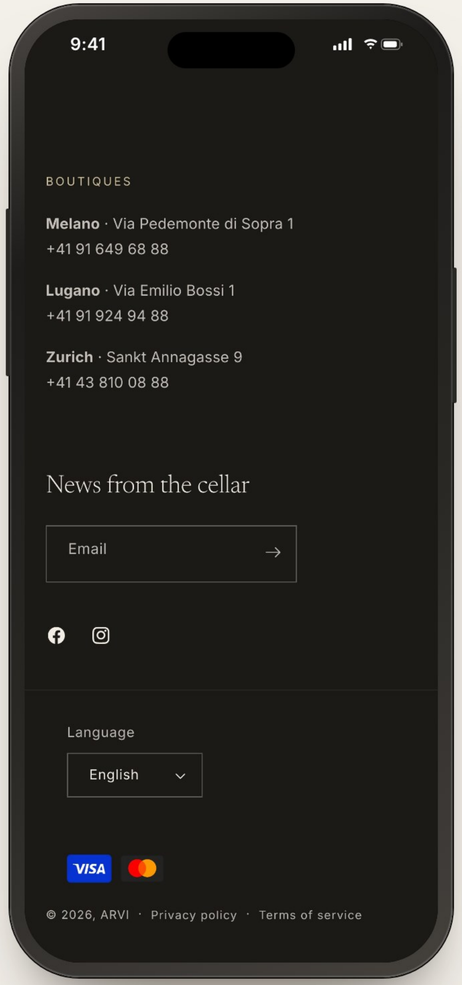

MOBILE FOOTER · PAYMENTS

Closing with confidence

Payment logos are Shopify’s own official artwork and follow the store’s payment settings automatically.

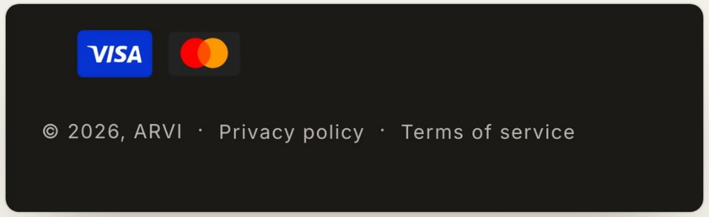

— **Shown today:** Visa and Mastercard, the methods ARVI’s FAQ confirms for online payment.

— **American Express, TWINT and Apple Pay** appear here automatically once enabled in Shopify Payments. They are not shown before that, so nothing is misrepresented.

FOOTER, END OF PAGE

Language, payments, legal

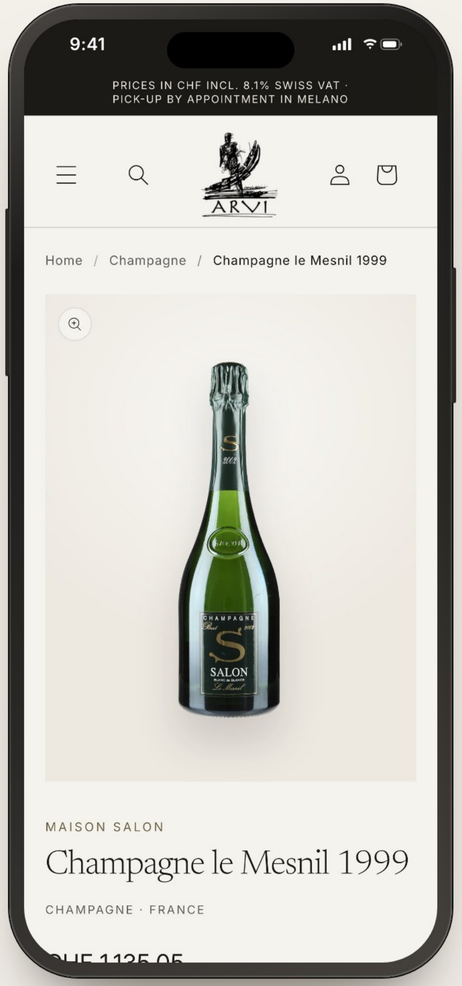

PAYMENT ROW, DETAIL

Shopify’s official logos at their native proportions

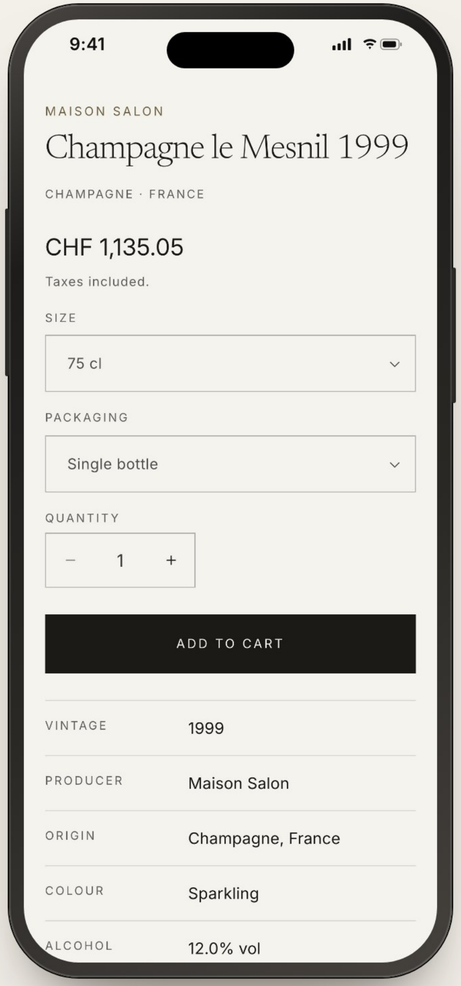

MOBILE PRODUCT PAGE

The bottle, then the decision

The packshot sits on the same warm stone as the rest of the site. Size and packaging come from ARVI's own catalogue options, presented as "75 cl" and "Single bottle".

PRODUCT
Full bottle, never cropped

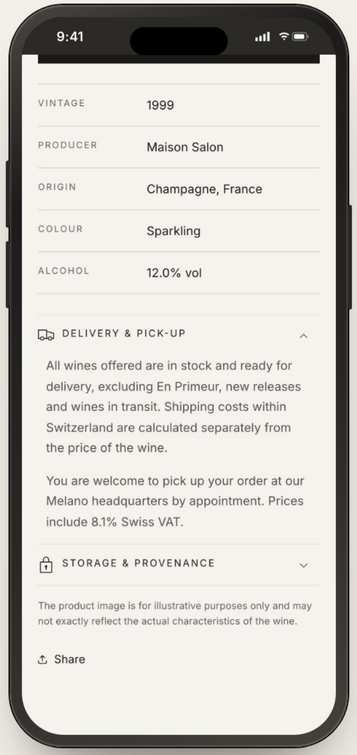

PURCHASE
Price in CHF, size, packaging, Add to cart

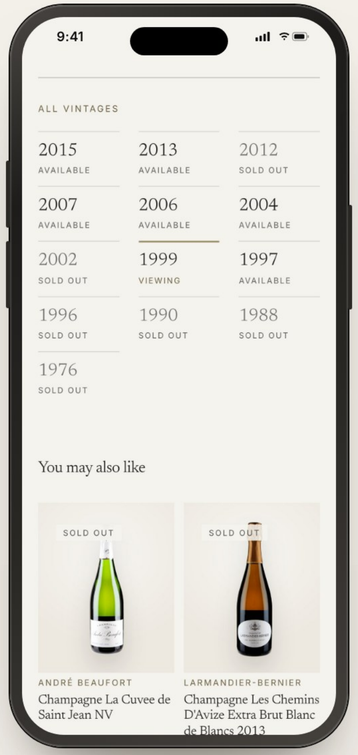

MOBILE PRODUCT DETAILS

Details a collector expects

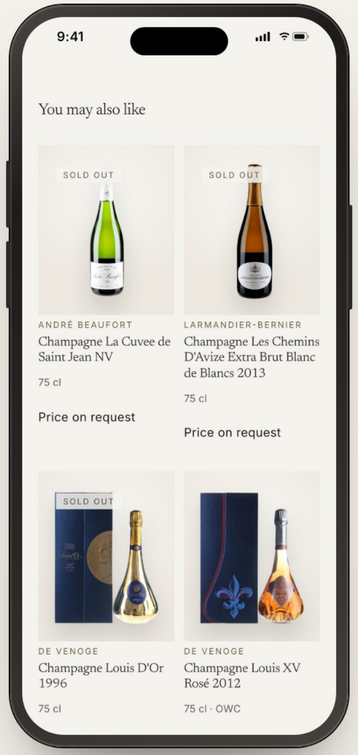

Every fact is read from ARVI's product data. Critic scores appear only once they are connected to ARVI's own metafields: nothing is shown without real data.

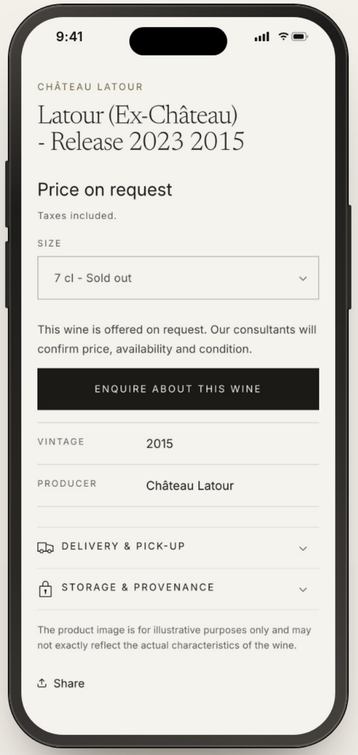

FACTS & SERVICE
Vintage, origin, alcohol; delivery

ALL VINTAGES
Available, sold out, viewing

YOU MAY ALSO LIKE
Other wines, never repeats

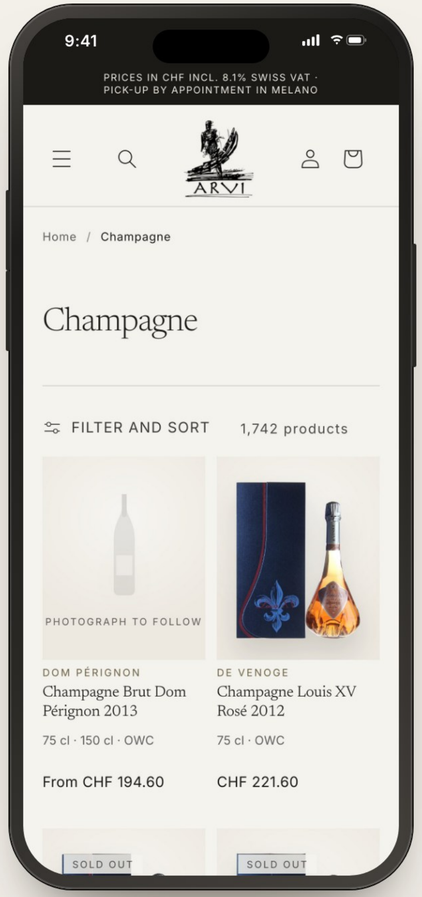

PRICE ON REQUEST
Enquiry instead of a CHF 0.00 price

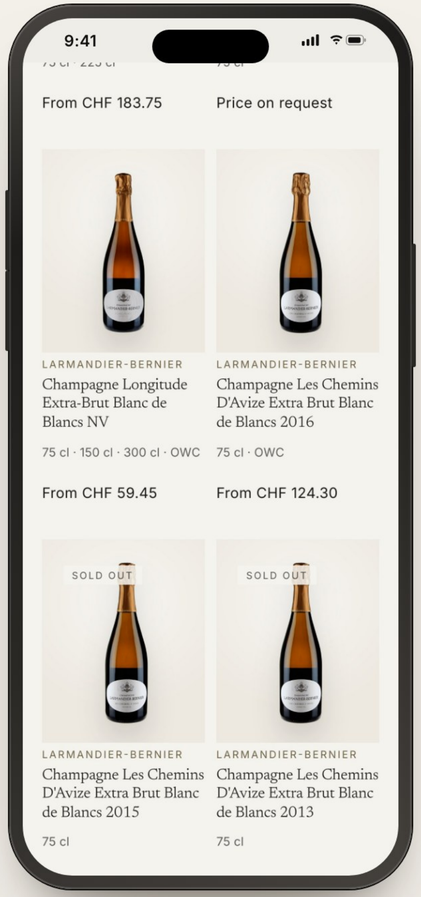

MOBILE COLLECTIONS

Browsing 10,000 labels on a phone

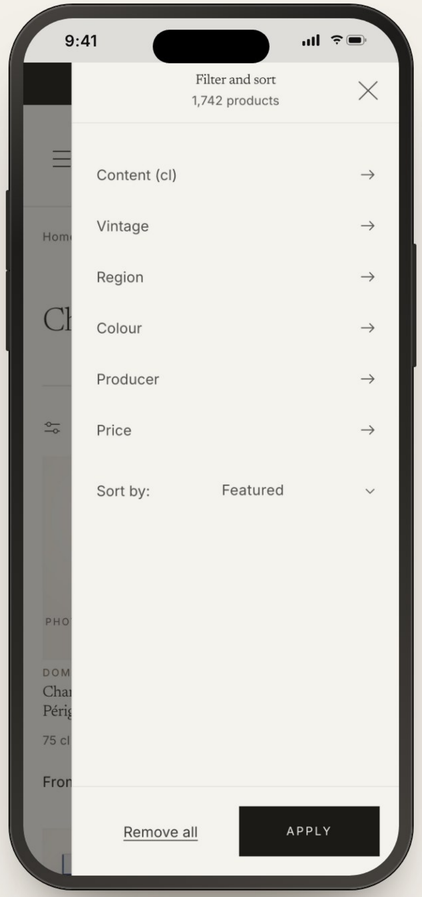

Two-column cards keep the bottle prominent. Wines without a photograph get a designed placeholder instead of an empty tile, and the title always stays visible.

COLLECTION
Title, count, filter & sort

PRODUCT CARDS
Producer, name, formats, price

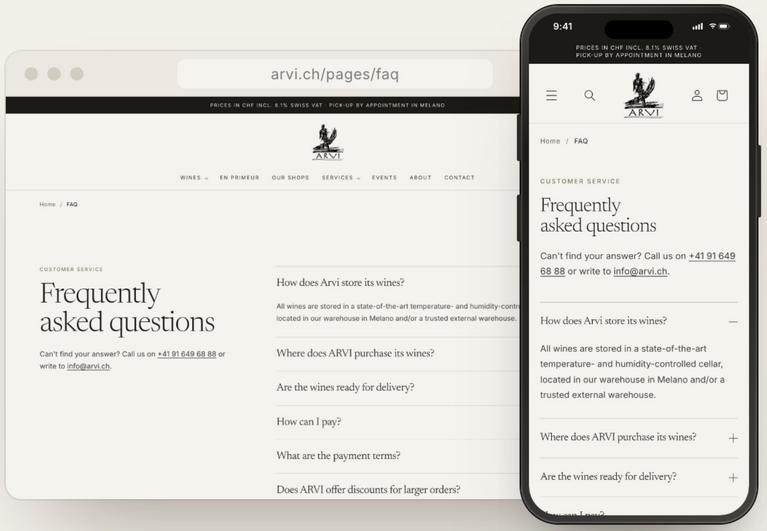

FILTER & SORT
Size, vintage, region, colour, producer

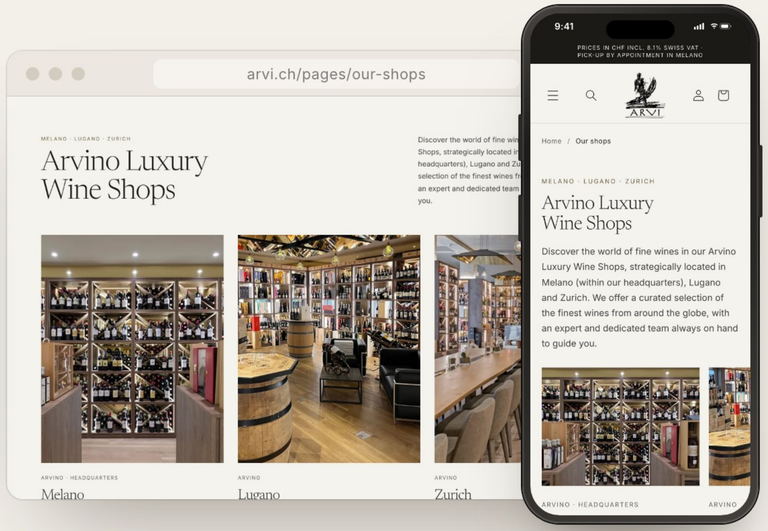

RESPONSIVE COMPARISON

One design, every screen

The same sections adapt rather than shrink: two columns become one, rows become rails, and type scales fluidly between 375 and 1920 pixels.

FAQ · desktop and mobile

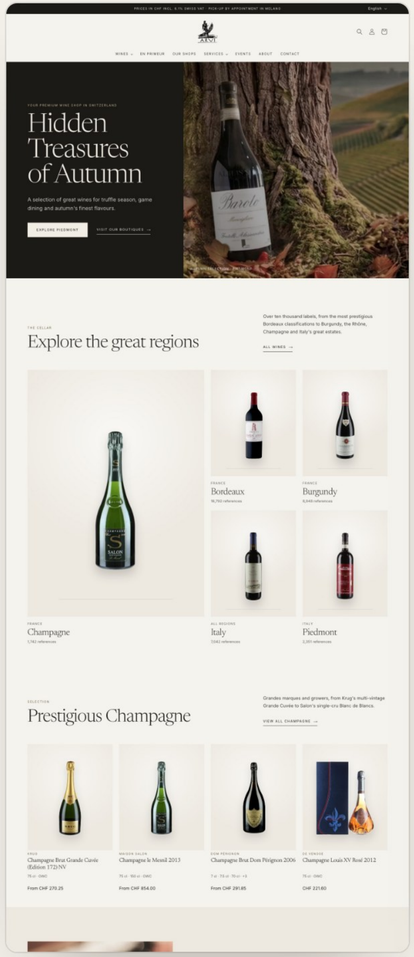

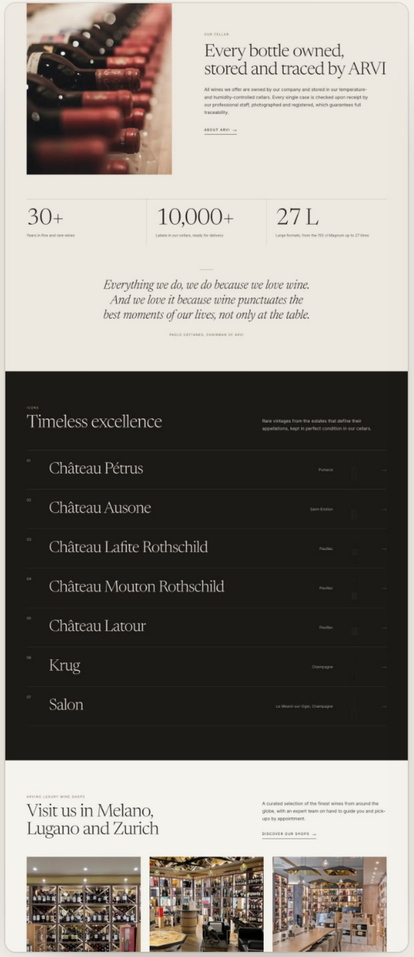

Boutiques · desktop and mobile

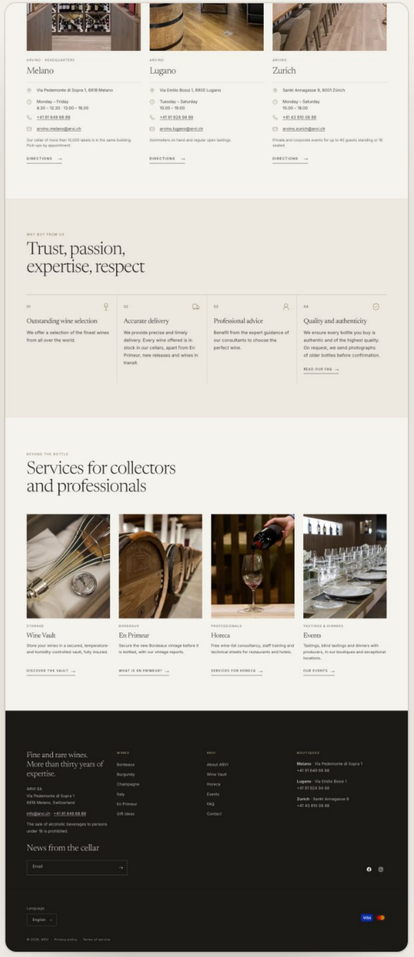

DESKTOP · HOMEPAGE

The full homepage

The complete desktop homepage, read top to bottom in three columns: hero, regions, selection, cellar, producers, boutiques, values, services and footer.

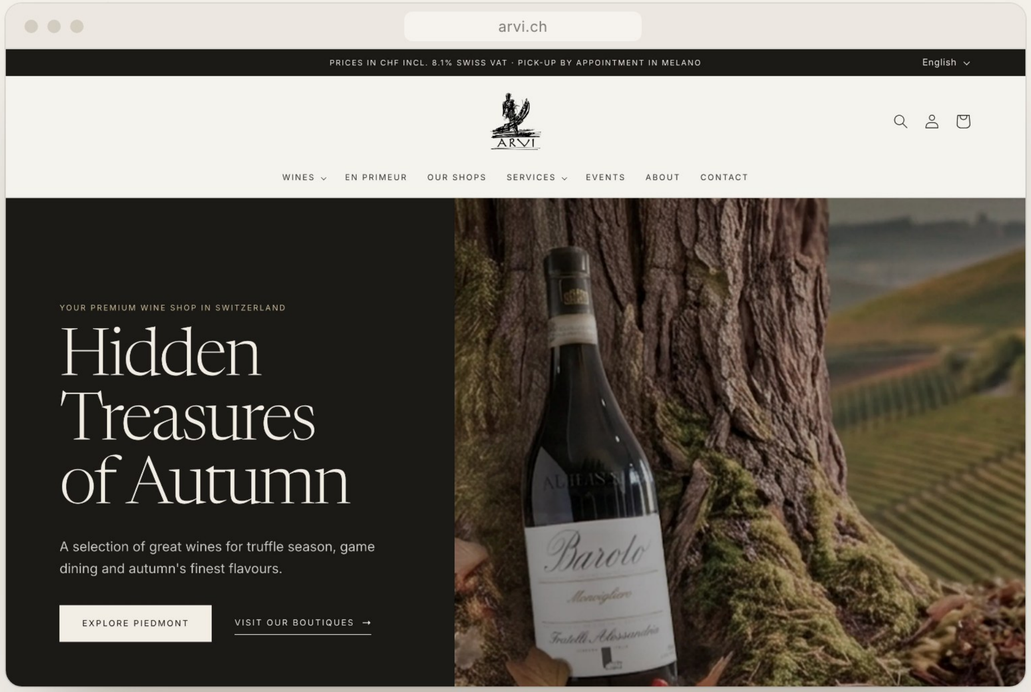

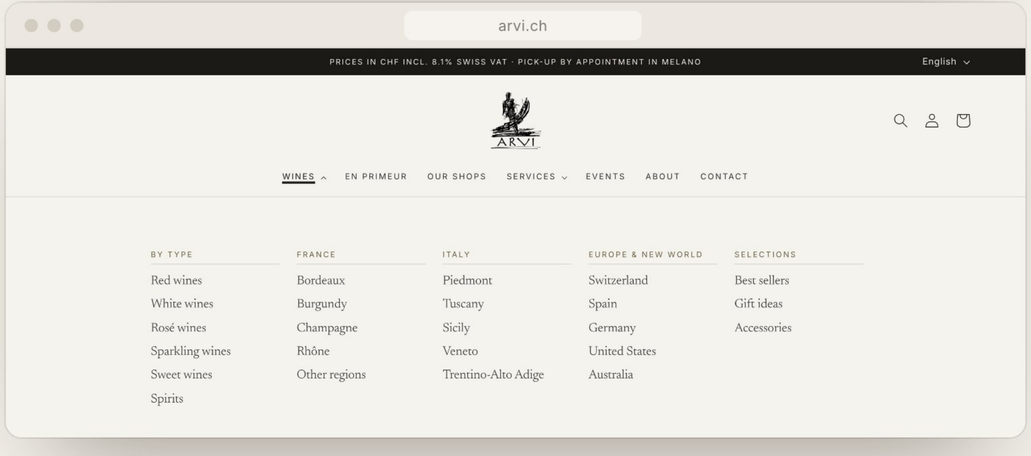

DESKTOP · NAVIGATION

Header, navigation and hero

A centred logo, quiet spaced-caps navigation and a mega menu organised the way ARVI's cellar is: by type, country and region.

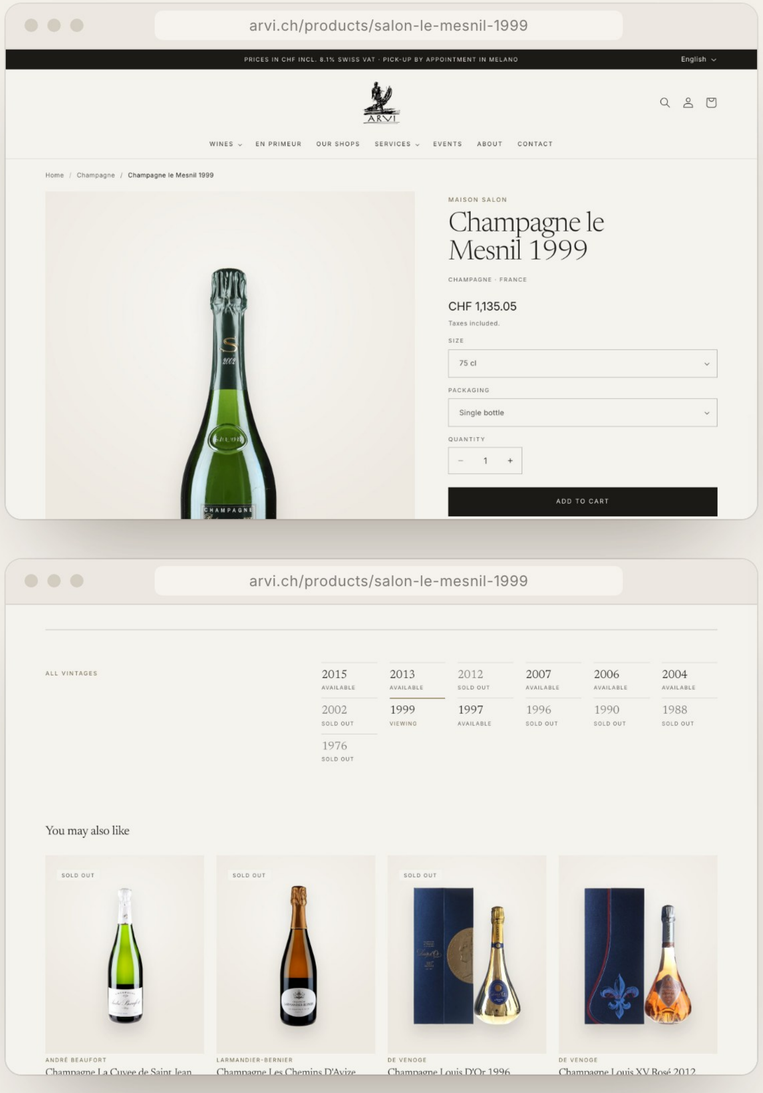

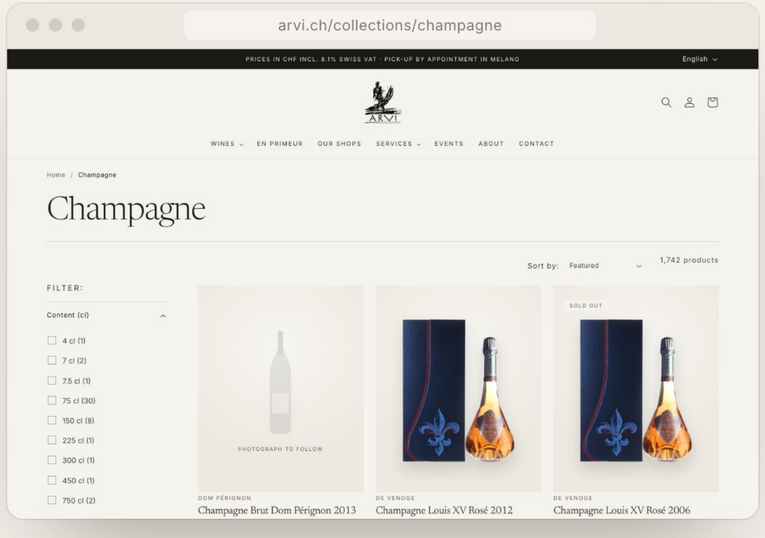

DESKTOP · SHOPPING

Product and collection

On desktop the purchase column stays beside the bottle while the vintage index runs the full width below.

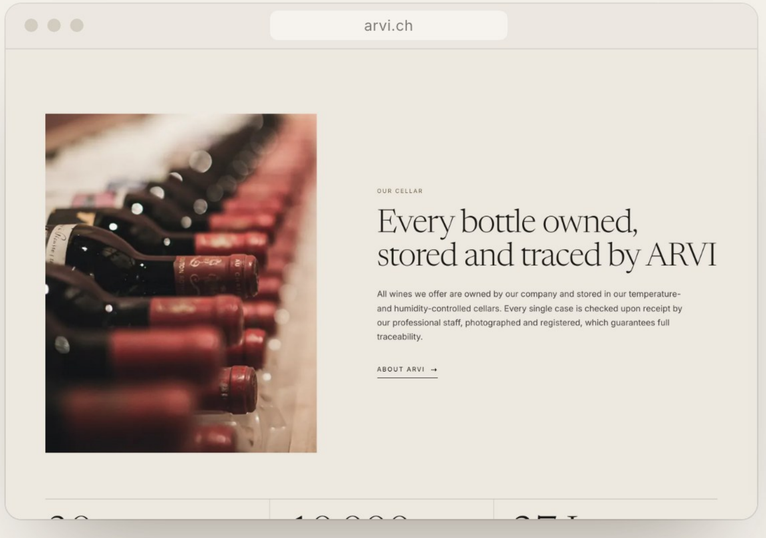

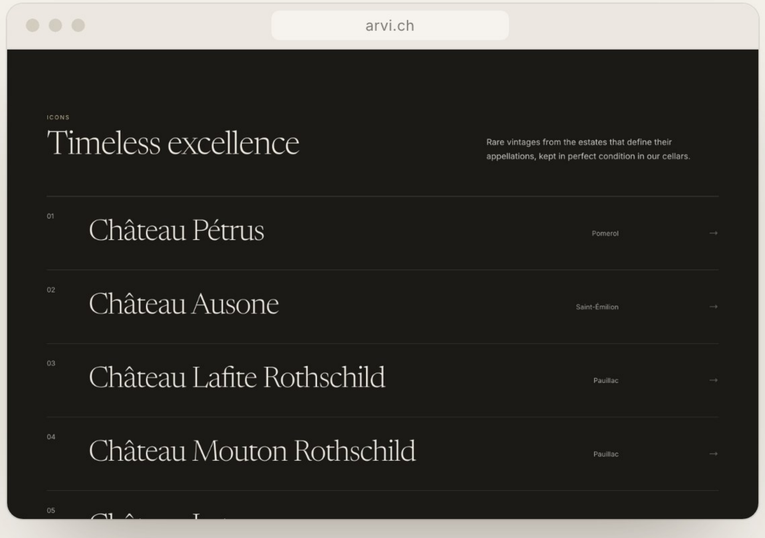

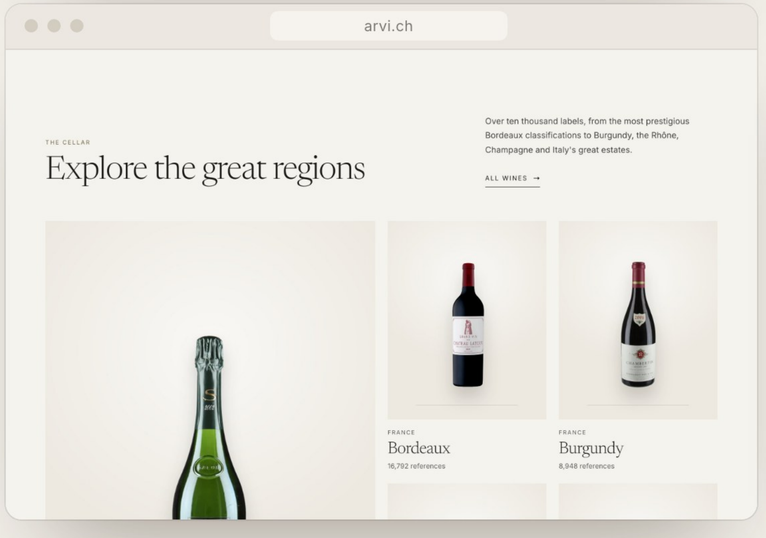

DESKTOP · EDITORIAL SECTIONS

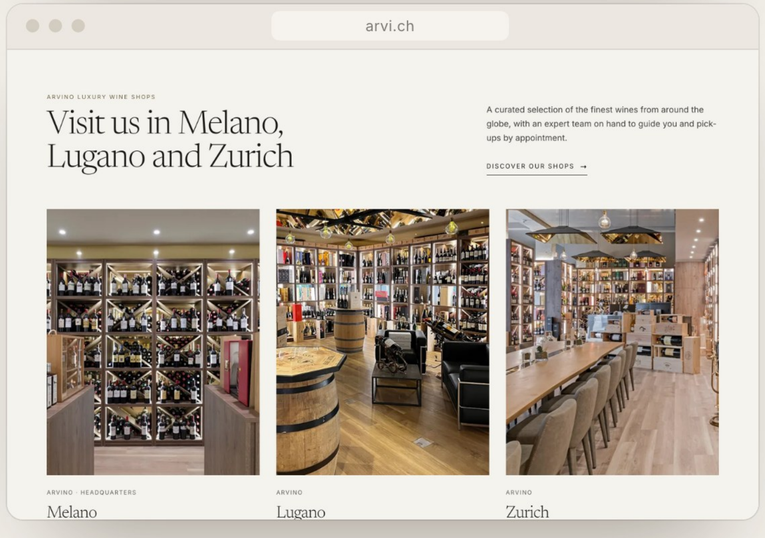

The brand story

Cellar, regions, icons and boutiques: the sections that turn a catalogue into a house.

DELIVERY

Ready to review on the store

Every screen in this presentation is a real capture of the working theme, rendered with ARVI's own catalogue.

What ARVI receives

— An installable Shopify theme built on Dawn 16.0.0, the same base as the current Shopify project.

— Editable sections for every part of the homepage, product page and boutiques, in Italian, German, French and English.

— A maintenance guide, QA reports and before/after screenshots.

Before launch

— Upload as an unpublished theme and review it in the Shopify editor; the live store has not been touched.

— Test cart, checkout and payments on the store. They are not yet verified.

— Confirm payment methods, connect critic scores to ARVI's metafields, and plan high-resolution boutique photography.
